

Antonina Syvak

Senior UX/UI Designer

Professional UI/UX designer with 5 years of experience in creating intuitive interfaces and effective user solutions. I strive to combine aesthetics with functionality, making each product user-friendly and appealing. I have developed over 300 websites, working on projects of varying complexity, from landing pages to comprehensive e-commerce platforms. I teach the fundamentals of web design in IT, helping beginners understand the basics and trends of modern design. I aim to use my skills to create solutions that not only meet user needs but also contribute to achieving business goals.

Work experience

2023.07 – currently

Head of Design Department, UX / UI Designer

Online Sharks (Netherlands)

During my time at Only Sharks, I have developed over 200 websites and increased the average design fee from 800 euros to 3200 euros. This has allowed us to not only improve financial performance but also enhance the quality and value of the services we offer to our clients.

- Developed and optimized UI/UX designs for websites, landing pages, and e-commerce platforms, applying user-centered design principles.
- Created responsive designs, UI kits, and component variations.
- Managed a team of 2 designers, coordinating project work and ensuring alignment with the overall strategy.
- Collaborated with 2 developers to implement UI/UX solutions and conducted quality control and testing of final products.
- Designed interfaces for mobile applications, developed brand styles, and created design elements to enhance brand recognition.
- Created interactive prototypes and conducted presentations for clients.

2022.12 – currently

UX/UI Designer, Lecturer

Hillel IT School (Ukraine)

I teach a course on "Fundamentals of Web Design" at an IT school, where I help students understand the basic principles of web design and develop practical skills. In this course, I explain how to create user-friendly and functional interfaces while introducing them to modern trends and design tools. I pay special attention to UX/UI principles, the proper use of colors, typography, and components for building effective websites.

- Development of lecture materials
- Conducting practical sessions
- Individual consulting
- Adapting the curriculum to trends
- Creating test assignments
- Supporting and motivating students

2022.08 – 2022.12

UX/UI Designer

Nova Poshta (Ukraine)

- Development of visual concepts to facilitate communication in the learning process.
- Collaboration with department managers to ensure the timely completion of project tasks.
- Creation of informational materials for the educational process.
- Design of materials for the department's operational processes.
- Providing visual content for projects on offline and online platforms.
- Development of banners, landing pages, and business cards.
- Layout of informational materials for the educational process.
